## Improving aesthetics

Workspaces and glass walls are at times in need of an upgrade to make the workspace more aesthetically pleasing. Whether this is done with the subtlety of 3M Matte Translucent Film or a more bold approach with the 3M Blackout Film, you will be pleased with the quality and results.

## Privacy at work

Many workspaces in large retail stores, offices, banks and hospitals are in need of private areas to protect employees or clients. 3M Privacy Films provide a range of products to meet your needs at a reasonable cost. Whether you are trying to obscure the view with 3M Matte or 3M Blackout Film, or you are trying to create a one-way mirror with 3M Mirror Film along with the correct balance of lighting, additional privacy can be obtained.

## Privacy from unsightly areas

Sometimes there is nothing you can do with an unsightly storage area or back office, other than block the view. 3M Blackout Film helps to solve this problem by completely blocking the light and view, and 3M Matte Film obscures the view while still allowing light into the space. Either way, these films can provide an aesthetic lift to the existing glass and space.

## Increased security

It's harder to steal what you can't see. 3M Blackout and 3M Matte Film can obscure the view into storage areas where valuable goods are kept, offices where money is counted or back rooms where security cameras are viewed. With the correct lighting balance, 3M Mirror Films can also be used to help protect security guards by allowing them to view an area without being easily seen. 3M Privacy Films help keep your facilities more secure.
